

What we Propose

We are proposing the transfer of your Domain Name and your website to Domainz.

Why use our company?

Domainz is New Zealand's largest and most experienced domain name registrar and is a wholly owned subsidiary of Melbourne IT Limited, one of the largest domain name registrars globally with more than 3.5 million domain names under management.

Domainz has a unique approach in the industry – we can help your business in almost any area with its website. With our comprehensive range of services we can be your **Online Business Partner**.

We help our customers to advance from having an **Online Presence** to having an **Internet Strategy**.

The Internet Strategy that we will help you to create will:

- Help you to have a professional looking website that will keep your customers looking at your products and services
- Make the website more visible on the search engines: there is no point in going through the time and expense of creating a website if nobody can see it
- Protect your Online Brand

How much does Domainz cost?

Domain Names

We register .co.nz domain names for \$61.87 per year. Gtld's such as .com are registered at \$67.50. We can provide you prices for other cctld's, such as .co.uk and .com.au.

With our Domain Name service we can give you advice on strategic domain names for your business, and we are the only New Zealand company that can help you to register any name in the world.

Hosting

Our UNIX hosting is suitable for most of our customers. The amount for Unix U1000 that we are offering to customers who are transferring in their websites is \$299. The following is more information on our hosting.

Domainz provides its customers with the most advanced and up to date hosting that is available. Our range of hosting has numerous features that will make your business easier to run, and will give you more information about your site.

Most customers are provided with our Unix U1000 plan. We offer customers who are transferring in their site discounted rates for UNIX hosting. The price will be \$299 per year, and you can reserve this price for two years.

Total for the transfer – Domain Name and the Hosting

1 year .co.nz Domain Name registration and 1 year Unix U1000 Hosting \$360.87
5 years .co.nz Domain Name registration and 1 year Unix U1000 Hosting \$546.48 (one year free registration)

Please note: The price of the transfer may be higher if there are features in the website that require specialist attention, i.e. email forms.

What are the key benefits of transferring to Domainz?

- In most circumstances there is a significant saving to be made by using our services. We can calculate this for you if required.
- Domainz has high levels of service and support: most often we answer calls within 20 seconds
- Our range of hosting options has many advantages. These details have been listed in detail on this website.
- We have a complete range of services that we can provide. With our comprehensive range of services we can be your **Online Business Partner**.

What other services can Domainz provide?

- Website Design: We will create a website that turns visitors into customers
- Website Maintenance: Whether on a contract basis, or case by case, we can keep your website up to date
- Search Engine Optimisation: Find out ways to get more qualified traffic coming to your site

With these services, in conjunction with our Domain Name service, and our Website Hosting, Domainz can truly be your online partner.

How do I transfer to Domainz?

It is very easy to transfer over. There are only a few details that we need. This is the UDAI code for the domain name and the FTP details for the website. We will assist you with gaining these details.

We will manage every aspect of the transfer, and we will help you with setting up your email accounts. There is minimal work for you to do.

Transferring to Domainz will be the first step in introducing you to our services, which are directed at gaining you more customers.
